The DadaPrint3r

DadaPrint3r

As a smart object,DadaPrint3r can print in Paris what you say in Marseille, here and there, from your smartphone. You can print anything from practical memos to love letters, right in your beloved's home.

DadaPrint3r translates into written words whatever you say into your phone using the DadaPrint3r mobile application. Based on Google voice recognition technology, all speech captured by the microphone is optimally and efficiently processed. However, occasional moments of uncertainty may yield surprising results, as unclear words are transcribed as known words selected from the stored vocabulary of Google's massive search database. As such, DadaPrint3R understands what you say, but also links you to the collective unconscious of

Google searches.
This combination of technological precision and artistic fuzziness gives DadaPrint3r a bit of fantasy, a bit of Dada.
Try it once, you won't be able to stop!

Buy the DadaPrint3r

2016 – Albertine Meunier

Materials
Little printer, Thermal paper roll, Arduino, Internet, Google voice recognition

Dimension
11 cm x 15 cm

Assistant
Bastien Didier

Programming
Sylvie Tissot / Tristan Savina

Fabrication
Albertine Meunier / Huieun Kim / Bastien Didier
Art2M Co Production

Exhibitions
2016 Futur en seine - Carreau du Temple - Paris, France
2016 Viva Tech - Parc des Expositions, Porte de Versailles - Paris, France
2016 Variations Show Off - Espace des Blancs Manteaux - Paris, France
2016 Icart Media Festival, Paris - Icart - Paris, France
2016 Semaine des Arts de Sciences Po - Sciences Po - Paris, France
2015 Variations Show Off - Espace des Blancs Manteaux - Paris, France

Technical note

Schematic diagram

DadaPrint3r

Connect the computer and the DadaPrint3r to power
Connect the computer and the DadaPrint3r to internet
Connect the microphone to the computer and go to objet.io/est-ce-que-tu-m-aimes/
or Launch the DadaPrint3r application on your mobile phone
Talk and it will print your blahblah to the DadaPrint3r
