

The infinite book among the books in the library of the École Estienne

The Infinite Book

The infinite book is an entirely blank book. The book's content appears only when its pages are turned. The infinite book offers a brand new way of printing content. This type of printing could be defined as printing digital content on the fly, as the digital material available (text, image, video, tweet, instagram, etc) is displayed once the page is identified.

The collection of contents for the Infinite Book:

- . Googlebook : Giving back materiality to the scanned books by Google,
- . Memory Books : Create your memory book with your pictures and videos,
- . Tweetbook : Better than a Tweet Wall, it lets you go through in real time the stream of any hashtag or Twitter account,
- . Instabook : Immortalize in real time public pictures posted on Instagram with the tag of your choice,
- . Fairybook : Poetic story, thanks to graphics animations and typographics, starts when pages are turned.

The Infinite Book will be exhibited on the Galerie Claude Bernard, Art Paris, 30 March to 2th April 2017 . [more info](http://albertinemeunier.net/livre-infini/en)
