

## *Mona LHO*

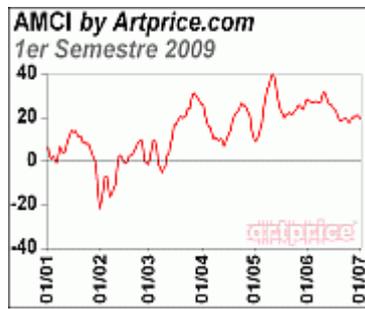

In January 2008, Artprice launched a powerful measuring tool—the Art Market Confidence Index—capable of appreciating art market trends in real-time.

The Art Market Confidence Index (AMCI) is a value generated by Artprice according to a large number of art market indicators. Its value fluctuates over time between -40 and +40.

When the art market is confident, the AMCI is positive; when the market is morose, the AMCI is negative.

Mona LHO is an Internet-connected art piece that restores and displays this Art Market Confidence Index in real-time.

Basically, this object is a connected ready-made.  
Mona LHO is a ready-made of modern times through its relationship to the art market and its connection to the Internet.

## 2011 - Albertine Meunier

### Materials

Mona Lisa ashtray & Cigarette holder, Arduino, Arduino ethernet shield, Arduinix

### Programming

Arduino: Tobias Muthesius  
AMCI script adaptation : Jérôme Alexandre

### Fabrication

Tobias Muthesius

### Exhibitions

2012 PARIZONE @DREAM - Area Gallery - Paris, France
